w14-p1: save a product to postgresSQL server, show code and new data in pgAdmin

The screenshot displays a development environment with three main windows:

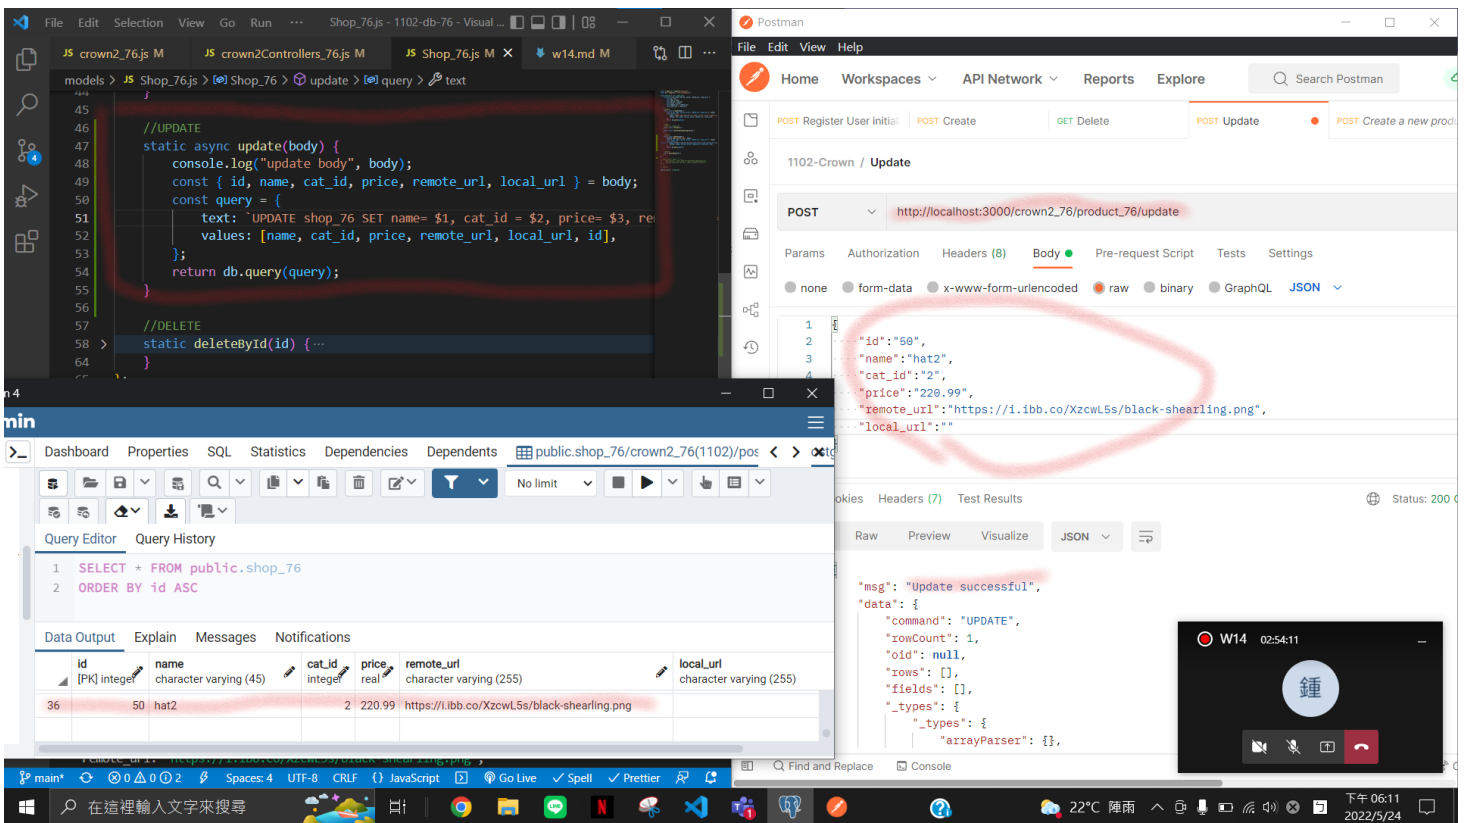

- Visual Studio Code:** Shows the `controllers > JS crown2Controllers_76.js` file. The code defines a `createProducts` function that uses `Shop_76.create` to save data to the database. A red box highlights the function definition.
- Postman:** Shows a `POST` request to `http://localhost:3000/crown2_76/product_76`. The response is a JSON object with a `msg` field: `"create -- body data received"`. A red circle highlights the response body.
- pgAdmin 4:** Shows the `public.shop_76/crown2_76(1102)/pos` table. The `Query Editor` shows a `SELECT * FROM public.shop_76 ORDER BY id ASC` query. The `Data Output` table shows the following data:

id	name	cat_id	price	remote_url	localUrl
34	Jean Long Sleeve	5	40	https://i.libb.co/VpW4x5t/roll-up-jean-shirt.png	/img/mens/roll-up-jean-shirt
35	Burgundy T-shirt	5	25	https://i.libb.co/mh3VM1f/polka-dot-shirt.png	/img/mens/polka-dot-shirt
36	hat1	1	20.99	https://i.libb.co/XzcwL5s/black-shearling.png	

w14-p2: delete a product using route /product_xx/:id

w14-p3: update a product using route `/product_xx/update/:id`
